

What is TLS?

TLS is an encryption standard. In order to provide the highest level of security our site requires that you use a device that is using TLS1.1 or higher. Today, all recent versions of the major browsers provide the option to user TLS1.1 and higher.

Enabling SSL Version TLS1.1 and TLS1.2

Internet Explorer:

1. Open Internet Explorer
2. Click Alt T and select "Internet Options".
3. Select the "Advanced" tab.
4. Scroll down to the "Security" section.
5. Locate and check "Use TLS 1.1 and TLS 1.2".
6. Then, press the "OK" button.
